LUKAS Berlin
Water Mixable Artists' Oil Colour

LUKAS BERLIN contains only selected pigments of the highest possible authenticity in its class. Modified linseed and sunflower oils in „pharma quality“ are used as binders. To enable an oil-colour that is water mixable, without affecting its other characteristics (such as drying-time, light fastness and brilliance), LUKAS has developed a special procedure of modifying oils to guarantee a nearly water-free and water-resistant (colour) film structure. LUKAS BERLIN dries in completely the same way as a real oil colour, which makes LUKAS BERLIN a very good alternative for professional painters and users with solvent allergies. Available in 30 colour shades in tube size 9 (37 ml) and 14 (200 ml).
